UAC to realise revenue this year from CNG plant

Universal Adsorbents & Chemicals will realise revenue of Bt120 million in the second half from its new Sukhothai project, which has commenced commercial operations to produce compressed natural gas (CNG).

UAC chief executive officer Kitti Jivacate said the company expected to realise full revenue from next year onwards at between Bt300 million and Bt350 million per year. The project has an annual production capacity of 20,000 tonnes.

UAC is also set to create two additional compressed bio-methane gas projects, which are expected to start commercial operations next year.

The company's existing bio-methane gas plant is located in Chiang Mai.
