Subject: Notification of temporary suspension of Associated Gas delivery from Siam Moeco Ltd.

To: President
The Stock Exchange of Thailand

UAC GLOBAL Public Company Limited ("UAC") has notified from Siam Moeco Ltd. ("SML") about the temporary suspension of the production at Burapa-A due to downhole mechanical trouble of a Burapa-A producing well. The temporary suspension of Associated Gas delivery will start from June 3, 2017. Meanwhile, SML is considering the solution which will be notified UAC when SML will have final decision.

In this regard, UAC would like to clarify that the suspension of Associated Gas delivery from SML will cause the decrease of approximately 15% from total raw material of Petroleum Production Plant in Sukhothai province ("PPP"). Nevertheless, UAC is under negotiation with the other oil well sources to increase associated gas to reach designed production capacity and to increase petroleum product of PPP. Besides, such suspension will cause the slightly decrease of revenue from Sao Thian Power Plant but the increase of ft from electricity price will be a positive impact to revenue from Sao Thian and Pra Doo Thao as well.

Please be informed accordingly

Yours sincerely,
